

Experiment 1: Flight Reservation System

Question

Create a simple cloud software application for a **Flight Reservation System** using any Cloud Service Provider to demonstrate SaaS with fields such as One Way, Round Trip, From, To, Departure, Return Date, Travelers & Class, Fare Type, International and Domestic Flights.

Aim

To develop a cloud-based Flight Reservation System using a SaaS platform that enables users to search, book, and manage flight reservations online.

Procedure

1. Log in to Zoho Creator.
2. Create a new application named **Flight Reservation System**.
3. Create forms such as Passenger Details, Flight Details, and Reservation.
4. Add required fields like source, destination, travel date, class, fare type, and trip type.
5. Use Lookup fields to connect Passenger and Flight forms.
6. Create reports to display booking information.
7. Test the application by making sample flight reservations.
8. Save and publish the application.

Result

A cloud-based **Flight Reservation System** was successfully developed using a SaaS platform. The application allows users to search flights, book one-way or round-trip tickets, manage passenger details, and view reservation reports.
