

Experiment 2: Property Buying & Rental System

Question

Create a simple cloud software application for a **Property Buying & Rental System (Chennai City)** using any Cloud Service Provider with fields such as Buy, Rent, Commercial, Rental Agreement, Area, Place, Range, and Property Value.

Aim

To develop a cloud-based Property Buying and Rental System for managing property listings, customer details, and rental or purchase agreements.

Procedure

1. Create a new application named **Property Buying & Rental System**.
2. Create Customer Registration, Property Details, and Booking & Agreement forms.
3. Add fields for property type, location, area, property value, rental amount, and agreement details.
4. Use Lookup fields to connect Customer and Property forms.
5. Create reports for available properties and booking history.
6. Test property booking and agreement generation.
7. Publish the application.
