

Experiment 6: Payroll Processing System

Question:

Create a simple cloud software application for a **Payroll Processing System** using any Cloud Service Provider with employee details, salary components, gross pay, and net pay.

Aim:

To develop a cloud-based Payroll Processing System for managing employee salary information.

Procedure:

1. Create Employee, Salary Structure, and Payroll forms.
2. Enter employee information.
3. Add salary components such as Basic Pay, HRA, DA, TA, Bonus, PF, and Tax.
4. Connect Employee and Salary forms using Lookup fields.
5. Calculate Gross Pay and Net Pay.
6. Generate payroll reports.
7. Publish the application.

Implementation:

The screenshot displays a web application interface for a Payroll Processing System. The main content area is titled 'Deductions' and contains a form with the following fields:

- Employee: A dropdown menu with '-Select-' as the placeholder.
- Pay Period: A text input field with '-Select-' as the placeholder.
- Deduction Type: A dropdown menu with '-Select-' as the placeholder.
- Amount: A text input field with '#####.##' as the placeholder.
- Percentage: A text input field.
- Effective Date: A date input field with the format 'dd-MMM-yyyy'.
- End Date: A date input field with the format 'dd-MMM-yyyy'.
- Is Active: A checkbox.
- Notes: A text area.

At the bottom of the form, there are 'Submit' and 'Reset' buttons. The left sidebar menu includes the following items:

- Dashboard
- Payroll Records
- Deductions (highlighted with a red background)
- Deductions Report
- Board
- Employees
- Payroll Disbursement
- Users
- Payroll Validations
- Employee Salaries
- Pay Periods

The top navigation bar shows the application title 'Payroll Processing System', a trial expiration notice 'Trial has expired', an 'Upgrade' button, and links to 'Edit this application' and 'Help'.
