

Experiment 7: Student Attendance System

Question:

Create a simple cloud software application for a **Student Attendance System** using any Cloud Service Provider with fields such as Student Name, Course, Present, Absent, Course Attendance, OD Request, Grade, and Attendance Percentage.

Aim:

To develop a cloud-based Student Attendance System for recording and monitoring attendance.

Procedure:

1. Create Student, Subject, and Attendance forms.
2. Enter attendance records.
3. Link Student and Subject forms using Lookup fields.
4. Calculate attendance percentage.
5. Generate attendance reports.
6. Test the application.
7. Publish the application.

Implementation:

The screenshot displays a web application interface for 'Student Attendance Management'. The main content area is titled 'Attendance Record' and contains a form with the following fields:

- Student: Text input field
- Class: Dropdown menu with '-Select-'
- Date: Text input field with placeholder 'dd-MMM-yyyy'
- Status: Dropdown menu with '-Select-'
- Time In: Text input field with placeholder 'HH:mm:ss'
- Time Out: Text input field with placeholder 'HH:mm:ss'
- Teacher: Text input field
- Notes: Text area
- Recorded By: Text input field

The left sidebar shows a navigation menu with the following items:

- Dashboard
- Attendance Record (selected)
- Attendance Record...
- Board
- Dashboard Summ...
- Student
- Class

The browser address bar shows the URL: https://creatorapp.zoho.in/saimrudulaa2087.sse_savee/student-attendance-management#form:attendance_record. The top right corner of the application indicates 'Trial has expired' and provides links for 'Upgrade', 'Edit this application', and 'Help'.

Showing 5 of 5

Result:

A cloud-based Student Attendance System was successfully developed. The application records attendance, calculates attendance percentages, manages OD requests, and generates attendance reports.
