

Experiment 9: Hospital Information System

Question:

Create a simple cloud software application for a **SIMATS Hospital Information System** using any Cloud Service Provider with patient details, doctor details, diseases, and attender information.

Aim:

To develop a cloud-based Hospital Information System for managing patient registration and hospital records.

Procedure:

1. Create Patient, Doctor, and Appointment forms.
2. Enter patient and doctor details.
3. Connect Patient and Doctor forms using Lookup fields.
4. Record consultation details.
5. Generate patient reports.
6. Test the application.
7. Publish the application.

Implementation:

Hospital information system for SIMATS Hospital
